-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16,31-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims are unclear to examiner. Applicant describes component (A) as a sugar or sugar alcohol then later as a glycoside. Is the glycoside the sugar and sugar alcohol?

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7,8,27,28,30 are rejected under 35 U.S.C. 103(a) as being unpatentable over McArdle (US 5747416; 5/5/98) and Brantley (US 3929448; 12/30/75).

McArdle teaches a method of applying a composition comprising a protein-polysaccharide to plants and cut flowers in order to preserve them. See abstract, column 1 lines 5-36. McArdle does not teach the application of sugar to flowers in order to preserve them. However, Brantley teaches a method of applying a composition comprising sugar to cut flowers (plants) in order to preserve them. See abstract, claims

Art Unit: 1616

1 and 7. It would have been obvious to one having ordinary skill in the art to combine the teachings of McArdle and Brantley to arrive at a single method comprising the application of a single composition comprising protein-polysaccharide and sugar. One would have been motivated to do this since both references individually teach a method of preserving flowers.

Claim Objection / Allowable Subject Matter

Claims 1,13-15,17-20,29,34 are allowable. The prior art does not teach or suggest the invention comprising the bonding of a hydrophobic group to a sugar via glycoside, ester or amide linkage.
